September 2026 Presidents Message

Planning the upcoming Historic Kansas Heritage Model A tour to Nicodemus with stops in Victoria, Hays, Ellis, Hill City and Russell is a reminder to me of everything I love about driving a Model A Ford. Getting off the beaten path, discovering our state's historical past and sharing not only the day but our love of the Model A with everyone we meet along the way. Kansas is the 15th largest state and is home to 625 incorporated towns connected by back roads and historical facts still waiting to be discovered. Traveling in a Model A helps bring Kansas' bygone past to life wherever our cars stop as they invite smiles, questions and memories from people who recall a parent, grandparent, neighbor or friend who owned or drove a Model A. Keep living the dream, drive your Model A!

"A" View of Nicodemus and Their Dusty Path

Historic Kansas Heritage Model A Tour (by Mike James)

Know before you go! My President's Message this month alludes to our State's historic past. Our upcoming Heritage Model A Tour to Victoria, Hays, Ellis, Hill City and Nicodemus will give us the opportunity to discover and reflect on our State's early days. Accordingly, I have listed below a very brief synopsis of each town we will be visiting. For members not traveling with us in a Model A, please review and travel vicariously as we journey into our Kansas' State's early past. Ahooga

Victoria – Cathedral of the Plains: Rising majestically above the western Kansas prairie, the Basilica of St. Fidelis was completed in 1911 through the faith and determination of Victoria's Volga-German settlers. Families hauled thousands of wagonloads of native limestone to build this magnificent Romanesque church, whose twin 141-foot towers can be seen for miles - a breathing monument to sacrifice, craftsmanship and community spirit.

(stfidelischurch.com)

Hays- Fort Hays State Historic Site: Established in 1865, Fort Hays was an important Army post that protected railroad crews, settlers and travelers during the turbulent days of the Old West. The post was associated with figures including George Armstrong Custer, Buffalo Bill Cody, Wild Bill Hickok and the African American Buffalo Soldiers. Four original buildings remain offering a glimpse into life on the Kansas frontier.

(kansashistory.gov)

Ellis – A Town Built by the Railroad: Founded as a Kansas Pacific Railway water station in 1867, Ellis grew into a major railroad division point with locomotive shops and railway workers. Among them was Walter P. Chrysler's father, whose son's early fascination with machinery eventually led to the Chrysler Corporation. The Railroad Museum and Chrysler boyhood home.

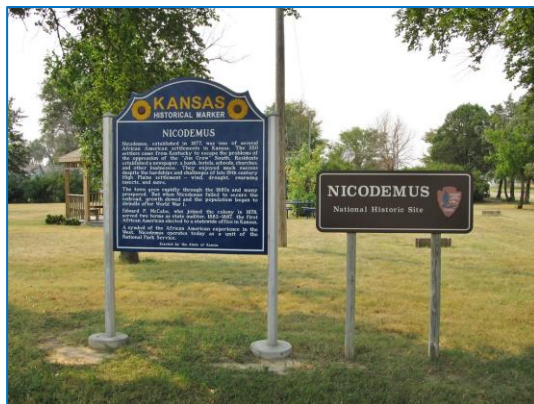

(ellis.ks.us)

Hill City-Graham County Auto and Art Museum: Hill City offers a special treat for anyone who loves old automobiles. Opened in 2021 inside a former service station, the Graham County Auto and Art Museum displays a rotating collection of classic cars motorcycles and tractors – including two Ford Model Ts featured in the 1973 movie Paper Moon.

(travelks.com)

Nicodemus – A story of Freedom and Courage: Founded in 1877 by African American settlers seeking freedom, land and opportunity after the Civil War, Nicodemus stands as one of Kansas' most inspiring historic communities. Arriving on a windswept and nearly treeless prairie, the settlers lived in dugouts and sod homes before building churches, schools, businesses and newspapers. Its surviving historic buildings and descendants preserve a powerful story of courage, determination and hope.

PAST TOURS & EVENTS

"A" Train Big & Small

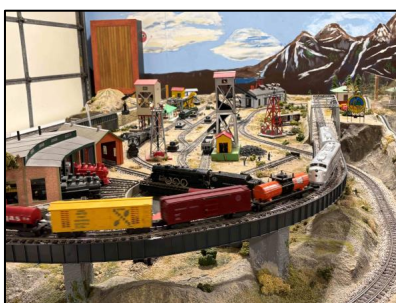

On the morning of August 22nd, several Model A Club members met at the Braums restaurant near Seneca and Douglas to begin tour of some local attractions in Wichita. Many cars were lined up to begin the tour which always manages to gather a fair amount of attention from the locals. Leaving Braums behind we started our adventure through downtown Wichita. We had quite the parade of cars "dragg'n' Douglas" on our way to our first destination!

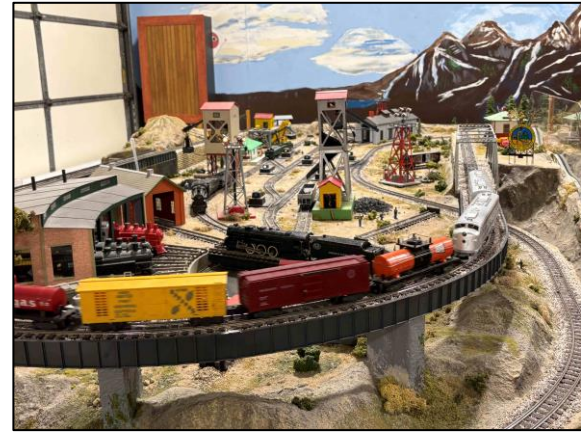

Our first stop took us to the Wichita Toy Train Club and Museum. This stop was suggested by club member **Don Grabendike**. Many folks including myself were unaware this site existed. What a pleasant surprise it was to find this place to be so interesting. We were given a bit of history and information about the facility and enjoyed exploring the meticulously arranged displays. There were several different scales of trains set up of very elaborately designed displays. There is even a "scavenger hunt" sheet to hunt and find different treasures hidden in each display.

Next stop we were off to visit the Great Plains Transportation Museum. Club members were allowed to park up top overlooking Union Station Plaza. There we were enlightened with many details of the train engines and several cars and cabooses on display. It turned out to be quite the history lesson regarding trains and a bit of history about Wichita. Many folks have passed under the train tracks on Douglas and noticed the Steam train displayed there but it's quite a different experience with a guided tour inside.

Lunch was our next and final stop. Our dining was located at B & C Barbeque just north of Douglas on Washington. Plenty of food and great conversation capped off a busy morning of train touring through our own hometown attractions.

"A" Evening at the Museum

The evening of August 22nd found members of our club at the aviation museum in southeast Wichita. The museum was hosting their annual fundraiser and soiree. The evening featured a theme from the early days of aviation including hosts dressed in vintage attire from pilots and flight attendants. Our club members provided short trips in our classic cars through a short trip around the grounds and delivered to the front doors of what was at one time the municipal airport terminal of Wichita. An international cuisine was featured for guests along with a troop of dancers depicting a Chinese style entertainment complete with dragon heads and drums. **Stuart McNeal**

Car Classifications

There seems to be a bit of confusion about the names of various auto body styles in recent years. Nowadays, most any two-seater with a folding top is called a "phaeton", with a dual-cowl phaeton being about the ultimate in desirability. A hundred years ago, a "phaeton" was a horse-drawn vehicle and any two-seater car with a folding top was simply a "touring car."

Any such long elegant car with that second small windshield back of the driver's seat was practically unknown in my part of the country anyhow. Such machines were driven only by the "Swells" in New York City, or perhaps California, and seem by us only in magazine accounts of the antics of the rich.

The following was taken from a 1921 text book for auto mechanics in vocational education schools.

Cars may be further classified as to construction, into a large variety of types. The nomenclature of the Society of Automotive Engineers includes

Roadster – An open car seating two or three. It may have an additional seats on running boards or in a rear deck.

Coupelet – Seats two or three. It has a folding top and full height doors with disappearing panels of glass.

Coupe – An inside – operated, enclosed car seating two or three. A fourth seat facing backward is sometimes added.

Convertible Coupe -A roadster provided with a detachable coupe top.

Clover Leaf – An open car seating three or four. The rear seat is closed to the divided front seat and entrance is only through doors in front seat

Touring Car - An open car seating four or more with direct entrance to the tonneau.

Salon Touring Car – A touring car with passage between front seats, with or without separate entrance to the rear seat.

Convertible Touring Car – A touring car with a folding top and disappearing or removable glass sides.

Sedan – A closed car seating four or more all in one compartment.

Convertible Sedan – A sedan touring car provided with detachable sedan top.

Open Sedan -A Sedan so constructed that the sides can be removed or stowed so as to leave the space entirely clear from the glass front to the back.

Limousine – A closed car seating three to five inside, with driver's seat outside, cover with a roof.

Open Limousine – A touring car with permanent standing top and disappearing or removable glass sides.

Berline – A limousine having the driver's seat entirely enclosed.

Brougham – A limousine with no roof over the driver's seat.

Landaulet – A closed car with folding top, seats for three or more inside, and driver's seat outside.
